# Northern Territory Disability Strategy 2022 – 2032

The Northern Territory Disability Strategy 2022 – 2032 (the Strategy) aims to address the barriers to equality, accessibility and inclusion experienced by Territorians with disability. People with disability have guided the development of the Strategy; their voices, experiences and choices are reflected throughout.

The Northern Territory (NT) Government believes that an inclusive and accessible society is fundamental to improving the lives of people with disability and to creating a welcoming and thriving Territory. This Northern Territory Disability Strategy Action Plan 2022–2025 (the Action Plan) shows how the NT Government and other stakeholders will make this happen. Beyond this, all stakeholders are encouraged to commit to the vision and principles, and to identify the actions that they can take to make a difference.

## Vision

An inclusive Territory where people with disability are valued, respected and can contribute to community, no matter where we live.

## Principles

The Strategy is based on the principles of the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD), which Australia has agreed to. The Strategy is also guided by the following principles, co-developed with people with disability:

- Promote the dignity, autonomy and freedom of people with disability.
- Champion the key role of those who support people with disability: families, kinship families, carers, guardians and significant persons.
- Ensure people with disability aren't disadvantaged because of personal circumstances, such as age or home location.
- Recognise the important role of Aboriginal peoples in achieving the outcomes of the Strategy.
- Value the importance of culture to improving life outcomes.
- Create environments that are culturally safe for Aboriginal people.
- Make people with disability the key decision makers in decisions that affect them, including by promoting collaboration and co-design between people with disability and other stakeholders.
- Recognise that disability is only one part of someone's story.

## Outcomes and Priorities

The Strategy is built around five outcomes for people with disability. These outcomes reflect the key themes that were identified by people with disability through the consultation process. Each outcome has a set of priorities for the life of the Strategy. This Action Plan identifies key actions to be implemented under each priority.

Outcome	Our Priorities
<b>1. People with disability have rights and choices which are protected and respected</b>	<ul style="list-style-type: none"> <li>• Empower people with disability to know their rights and have the tools to exercise them.</li> <li>• Strengthen informal advocacy networks and resources.</li> <li>• Enhance formal disability advocacy services.</li> <li>• Deliver disability confident and accessible justice and corrections systems.</li> <li>• Deliver disability confident and accessible police, fire and emergency services.</li> <li>• Support eligible Territorians to access the NDIS.</li> </ul>

<b>4. People with disability have the skills and opportunities to participate in the economy and be financially secure</b>	<ul style="list-style-type: none"> <li>• Provide education that meets an individual's lifelong learning needs.</li> <li>• Expand options for young people transitioning from school to employment or other forms of economic participation.</li> <li>• Increase employment of people with disability.</li> <li>• Support employers to be disability confident.</li> </ul>
<b>5. People with disability's health and wellbeing is supported</b>	<ul style="list-style-type: none"> <li>• Deliver disability confident, inclusive, and accessible health services.</li> <li>• Increase access to health education and prevention supports.</li> <li>• Enhance early identification of disability and referral to early intervention services.</li> <li>• Support all services to work together to improve a person's health outcomes.</li> </ul>

# Laying the foundations

## This Action Plan has been developed alongside the Strategy.

The three-year Action Plan is the first of the three action plans that will be developed over the life of the Strategy. This Action Plan lays the foundation for the implementation of the 10-year Strategy.

The actions chosen for this Action Plan have been selected as they align with key priorities that were raised in consultations with people with disability, government, community stakeholders, mainstream and specialist disability services and other stakeholders. The NT Government's actions under Australia's Disability Strategy 2021-2031 Targeted Action Plans have also been included<sup>1</sup>. These actions need to be established early on to set the direction for sustainable change and to build momentum for the Strategy.

The key focus areas of this first Action Plan include:

- Change community attitudes by increasing the community's visibility, understanding and acceptance of people with disability.

- Improve access to services for people with disability in remote locations, including disability services, health services, education services, community services and other types of services.
- Increase the availability of suitable housing options for people with disability and ensure that public spaces and buildings are designed with inclusion and accessibility in mind.
- Foster cultural connections for Aboriginal and Culturally and Linguistically Diverse people with disability, and build the cultural competency of disability service providers.
- Increase employment of people with disability, including through enhanced transition pathways from school.

The actions in the Action Plan mainly reflect commitments by NT Government agencies. Some actions from other organisations (including local governments, the community sector and industry) have also been included where commitments have been made.

These actions do not reflect all the work that is occurring across the Territory to progress these priorities and outcomes. Organisations are encouraged to formalise their commitments so that they can be included in future reporting against the Action Plan, and in future Action Plans.

Where possible, resources and reporting developed under the Action Plan will be made available online and in languages other than English spoken by Territorians.
